2018-2019

Torre

Parts and Components

Torre Parts and Components manufactures and distributes quality branded parts and components into the African market and operates across four distinct market segments namely, Automotive, Commercial, Off Highway and Industrial. Established in 1948, the company owns or represents a significant basket of well-known brands which include **Gabriel, Autocom, Echlin, VDO, ACSA-Mag, Textar, MagBrakes, SKF, Permatex Warn, Hi-Lift, Vision-X, Truck-Lite, Puisi, Pneumax, Raasm and Liquip.**

Based in City Deep in Johannesburg, with manufacturing operations in the Western Cape and Port Elizabeth, **Torre Parts and Components** employs some 500 people dedicated to its sales, marketing, warehousing, manufacturing and distribution operations, serving a network of customers throughout Africa.

Torre Parts and Components is both ISO9001 and ISO14001 certified as well as being an SABS certified company with a variety of supply contracts to both the aftermarket and original equipment markets.

Torre

Industries

Torre Industries Ltd is a Johannesburg Stock Exchange Listed industrial group that provides equipment, parts, financing and support services to its customers in selected high growth markets.

Torre's business is the value added sale and rental of branded capital equipment, the distribution of high quality aftermarket parts, the delivery of critical support services and the provision of financing solutions in support of our customer's expansion programmes.

Torre Industries is highly focused on the expansion and optimisation of our existing subsidiaries. In addition to our organic growth strategy, we are committed to a systematic acquisition strategy with all target companies operating in identified market sectors in which **Torre** seeks to operate. They must have an established market position with the inherent ability to grow sustainable earnings and cash flow once they become part of the Torre group.

The **Torre** business model has already evolved from one that was driven primarily by acquisitive growth to one that is focused on organic initiatives, with acquisitions as an additional growth engine. Over time it is expected that the growth attributable to acquisition activity will continue to decrease as a proportion of the overall growth of the business.

 **Torre**
Parts and Components
Experience The Support

IntelPart is your gateway to **Torre Parts and Components** complete range of Automotive, Commercial, Off-Highway and Industrial products at your fingertips. **IntelPart** offers the latest product, technical and cross reference information when and where you need it most.

The **IntelPart** online catalogue and ordering interface is fast, secure giving your business the benefit of sourcing, procuring and supplying parts from **Torre Parts and Components** and offers numerous features to assist in product search, order generation and saving regularly ordered parts. **IntelPart** also allows you to enter your entire order and will automatically place, process and release your order for delivery with **Torre Parts and Components**, making it your one stop online parts partner.

IntelPart gives you the option to track and trace your order, reprint invoices and delivery notes when and where required.

The ease of **IntelPart**'s dynamic search functionality in locating and identifying required parts is simple. 20 easily identifiable product categories simply guide you to refine your search to those parts you require or you can simply locate parts by part number, vehicle application or cross reference. The intelligent keyword search features will streamline the way you order parts. A key feature of **IntelPart** is that it gives you real time pricing and availability!

The ever-changing needs of your business is what drives IntelPart to continually update and meet your expectations.

HOW TO USE THE CATALOGUE

FITMENT GUIDE INSTRUCTION NOTES*

Note	Fitment Guide
1	Fit 2.5mm spacer either side lower sleeve front mounting
2	For rear use 414075 for lower mounting
3	For rear use sleeve 414164 and 414081 – top and bottom
4	Imported Beetle front use 19289, remove bar pin, fit 404702 + 414167
5	Remove lower sleeve
6	Remove top front shock bushing – fit 404702 plus 414167 remove sleeve lower mount
7	Re-use rear lower mounting bushes
8	Re-use rear lower mounting bushes. Using G45874 OR 61242 upside down does not work
9	Re-use spring seat upper mounting and bump rubber for rear shock
10	Use 414371 retainer (M48 x 1.0) for front
11	Use existing rear mounting
12	Use existing upper front mounting
13	Use existing upper rear assembly
14	Use existing upper rear mounting
15	Use kit 140729 for rear
16	Use kit 144028 x 2 for front and rear mountings
17	Use retainer 414334 with RS2000

Note	Fitment Guide
18	Use retainer 414363 (M48 x 1.5) when replacing Bilstein O.E. front units. Use existing upper rear mounting
19	Use sleeve 414167 lower for rear mounting
20	Use sleeve 414167 upper and lower for rear
21	When replacing struts with welded brake brackets use 414480 & 414481 brackets for rear
22	With rear lower eye mounting
23	With rear lower mounting bracket
24	Only fits applications with one pin at the bottom strut mounting
25	Re-use spring seat, upper mounting and bump rubber for rear shock
26	76042 for models with 25mm rubber bushes upper and lower. 76017 for models with 20mm sleeves upper and lower
27	77022 with Neway ARD 125/244 air suspension. 77018 with Hendrickson TA 460 air suspension
28	O.E. 16-13947-000 or 6913260400 for 85319 and O.E. 16-13957-000 or 680339 for 85724
29	Some use G56102 with 16mm eyes
30	Use 20mm spacer on lower mounting
31	Use 4 x 401754 rubber bushes
32	Use rubber bush 414323 x 2 for front and rear
33	Refer to fitment instructions located inside the box

* Should a fitment guide number not be specified, please revert to the standard fitment instructions on pages 156 and 157

OVERVIEW

Gabriel designs, engineers and manufactures shock absorbers for both the South African and international markets.

Gabriel's state of the art manufacturing facility (based in Retreat, Cape Town) houses its own product development, engineering and manufacturing divisions whereby products is designed and manufactured to the highest quality standards and distributed throughout the African continent.

All genuine Gabriel products are comprehensively tested by a team of qualified engineers and Gabriel's comprehensive range of shock absorbers are specifically designed and engineered to suit local South African conditions.

The Gabriel range includes:

- Gas and hydraulic shock absorbers
- MacPherson struts and cartridges
- Steering dampers
- Gaslifts®
- Accessories

The Gabriel product range is supplied through its wide distribution network under the following well known brands:

- Gabriel® Gas Rider™,
- Gabriel® Safari™
- Gabriel® Safari HDP™
- Gabriel® Technomatic™
- Gabriel® Fleet Ryder®
- Gabriel® Gaslifts®

Drivers who use Gabriel shock absorbers comment on the smooth ride of their vehicles, however shock absorbers are not just for comfort – their primary purpose is to keep the wheels in contact with the road surface. Shock Absorbers also affect the steering, handling and braking of your vehicle, which is why they are vital for your safety.

Our years of research and testing have resulted in Gabriel developing shock absorbers that are firm enough to prevent the wheels from leaving the road surface, but also flexible enough to ensure that the occupants are not directly subjected to the vehicle's forces.

Gabriel shock absorbers limit the bounce of the wheels by controlling the rate at which the suspension springs compress and extend. In doing so, the shock absorbers help maintain traction and control of the body, as well as the pitch and roll of the car during cornering, braking and acceleration. With more accurate control and steering, Gabriel shock absorbers enhance safety through good road holding.

PRODUCT RANGE

GABRIEL® GAS RYDER™

The Gabriel Gas Ryder Series offers an extensive range of South African shock absorbers, spring seat shock absorbers, MacPherson struts and MacPherson cartridges for passenger cars, sports cars, station wagons, small LCV's, MPV's and SUV's.

With the unique nitrogen gas-pressured dynamic response design, Gabriel Gas Ryder gives both an exceptional ride as well as a quicker response time compared to ordinary shock absorbers – the ultimate in both comfort and safety.

Allowing for greater ride control and performance, comfort and ultimately safety, the Gabriel Gas Ryder and its Gabriel warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

GABRIEL® GAS RYDER™ STRUT

GABRIEL® GAS RYDER™ SPRING SEAT

GABRIEL® GAS RYDER™ SHOCK

GABRIEL® GAS RYDER™ CARTRIDGE

GABRIEL® TECHNOMATIC™

The Gabriel Technomatic Series offers an extensive range of robust and genuine South African shock absorbers, spring seat shock absorbers, MacPherson struts and MacPherson cartridges for today's passenger cars. Station wagons, MPV and LCV applications for use on both tar and gravel road surfaces.

Providing a firm yet comfortable ride with a fast response time, the Gabriel Technomatic Series and its Gabriel warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

GABRIEL® TECHNOMATIC™ STRUT CARTRIDGE

GABRIEL® TECHNOMATIC™ STRUT

GABRIEL® TECHNOMATIC™ SPRING SEAT

PRODUCT RANGE

GABRIEL® SAFARI™

The Gabriel Safari Series offers an extensive range of genuine, robust large bore South African oil and gas shock absorbers catering for the demanding requirements of today's light commercial, heavy passenger vehicles, station wagon, South African taxi's, SUV and MPV applications both on and off-road.

Allowing for greater ride control, comfort and ultimately safety, the Gabriel Safari Series and its Gabriel warranty delivers up to its historical South African pedigree and provides for total driving peace of mind.

GABRIEL® SAFARI™ SPRING SEAT SHOCK

GABRIEL® SAFARI™ GAS SHOCK

GABRIEL® SAFARI HDP™

The Gabriel Safari HDP is a genuine robust, technologically advanced, big bore shock absorber specifically designed and manufactured in South Africa to cater for the heavy-duty performance requirements of today's SUV, 4x4 and light commercial applications.

Allowing for greater ride control and increased comfort over other comparative shock absorbers in the market, the Gabriel Safari HDP and its 3 year unlimited kilometer warranty delivers up to its historical Gabriel pedigree and also sets a new standard for performance based shock absorber applications.

GABRIEL® SAFARI HDP™ SHOCK

GABRIEL® SAFARI HDP™ SPRING SEAT SHOCK

VEHICLE LISTING – SHOCKS, STRUTS & CARTRIDGES PASSENGER & LIGHT COMMERCIAL VEHICLES

The Vehicle Listing section is an easy to use vehicle reference to all Gabriel part numbers, product ranges and technical information according to the specific vehicle make, model, derivative and year: This Includes all passenger cars, MPVs, SUVs, 4X4s, Pick-ups, Trucks and Busses.

The product ranges that are highlighted in this section include the Gabriel Gas Ryder™, Safari™, Safari HDP™, Technomatic™, Fleet Ryder® and Heavy Duty Shocks, Struts and Cartridges.

Where a vehicle is referenced to more than one part number/range of Gabriel product, please refer to the section at the beginning of the catalogue (beginning on page 7) where we define the main features, benefits, placement and warranty of each range offered.

The preferred part number/range for each application listing is always listed at the top with preferred alternatives below.

PARTS LISTING – SHOCKS, STRUTS & CARTRIDGES

The Parts Listing highlights our products in alpha numerical order according to their part number. This allows for easy reference to the applicable make and model of the vehicles when finding an application or applications which use that Gabriel part number.

The product ranges for each part number is indicated. For more detailed information on the Gabriel ranges, please refer to pages 8-10. For product dimensions and end-mountings refer to the Technical Section starting from page 153.

Some Gabriel Europe imports are stamped with a manufacturing number and are not listed in this section and these will be found in our Parts Finder section starting from page 123.

PARTS FINDER – SHOCKS, STRUTS & CARTRIDGES

The Parts Finder is designed to simplify the selection of an alternative manufacturer's part by listing other part numbers in alpha numeric sequence and not by manufacturer.

Where a manufacturer's part number has various Gabriel part numbers that may be used, these are listed as alternatives.

The Gabriel Europe & Gabriel India manufacturing numbers are also listed with the part numbers given as alternatives.

Please note that any reference to brands, trademarks or Manufacturer's part numbers is for reference and identification purposes only.

TECHNICAL INFORMATION – SHOCKS, STRUTS & CARTRIDGES

This section gives you detailed technical information on our shocks, struts and cartridges. This includes technical guides, drawings, and end mounting details, all of which is referenced to and from the vehicle listing and the parts listing.

Included in this section is a Fitment Guide which provides additional information on the removal, fitment and disposal of our products, as well as a section on extended and collapsed lengths that gives you the dimensions of our products as well as the end mountings and accessory packs that come with the product.

HOW TO MEASURE EXTENDED AND COLLAPSED LENGTHS

HOW TO PROTECT YOUR STRUTS

PART NO: 143057

GABRIEL STRUT CUSHION

Torre Parts and Components wants to emphasize the importance of renewing damaged or missing strut cushions (bump rubbers).

Damaged or missing strut cushions that are not replaced during strut and cartridge fitments can cause premature strut failure.

A strut cushion consists of a convoluted rubber boot or gaiter and a urethane compression bumper. These fit together and slide over the piston rod to rest on the strut's body.

The gaiter protects the strut's chrome piston rod from damage, keeps dirt out of the seal, pitting from stone chippings and corrosion from whatever the road may throw up.

The compression bumper, which fits into the boot, avoids internal damage being caused by preventing metal-to-metal contact under severe compression of the piston rod.

GASLIFTS & STEERING DAMPERS

The Gabriel® Gaslift® range is locally designed and developed to be a simple, hassle free, cost effective and customisable solution, that will allow you to take the lift out of lifting.

Used to open and close various items, the Gabriel® Gaslift® range is used on vehicle bonnets and -boots, doors, canopies, trailers, sunbeds, windows and many more applications.

Available in both an extensive automotive and industrial range, the Gabriels® Gaslift solution via a variety of high quality, long lasting end fittings that will best suite your application and lift angle. Also through our national gas filling solution, you can fill the differing units to the specific pressure that you will need to meet the required weight, angle and application.

PRODUCT RANGE

Gabriel® Gaslift®

Takes the lift out of lifting.

The Gabriel® Gaslift® series is designed to be a hassle free and customisable solution to assist in many various applications from, bonnet and boot applications, opening, holding open and closing doors to canopies, sun beds and window solution.

The Gabriel® Gaslift® range is also available in extensive automotive and industrial applications.

The range is supported through a variety of connection end fittings. Further, there is a national gas filling solution to fill units to a specific pressure to meet the required weight, angle and solution.

All of the range is covered by the Gabriel warranty and delivers up to its historical South African pedigree and provides for total peace of mind.

Gabriel® Gaslift®

Gabriel® Gaslift®

Product Features

- Ø16 and Ø19 Bore working cylinder
- Designed to be used to a pressure of up to 1000N (rod size applicable)
- Uses specific oil infused with nitrogen which is designed to work in South African and African climates
- Single lip rod seals
- Sintered metal rod guides
- NBR rod seals
- Gabriel® 12 month warranty

Product Benefits

- A hassle-free ready to use solution for both industrial and automotive requirements
- The industrial range can be customised for particular applications:
 - 4000 Series can be pressurised to 500N
 - 4100 Series can be pressurised to 1000N
- Plastic or metal end fittings to suit specific applications and cost options
- Universal canopy replacements
- Manufactured locally to the highest quality standards using premium quality components

The Gaslift® spring consists of a cylinder, piston and rod assembly able to extend and contract telescopically. The cylinder is filled with nitrogen gas at a very high pressure. It is this gas pressure which creates the lifting ability of the Gaslift® and the force exerted is proportional to the gas pressure.

A measured quantity of oil inside the Gaslift® lubricates the piston assembly and provides damping at the end of the extension movement. The damping imparts a more gentle action to the object being moved. Therefore, the Gaslift® should always be mounted with the rod in a downward position, when the door is fully opened.

CALCULATING THE FORCE (F1)

Required to hold the lid in the Open position
Refer to the diagram:

- F1 – Force exerted by Gaslift® in Fully Extended Condition
- U – Upper Mounting Point
- L – Lower Mounting Point
- P – Pivot Point
- CG – Centre of Gravity
- A – Horizontal Distance from CG to Pivot Point P
- B – Perpendicular Distance from axis U-L to Pivot Point P
- W – Weight/Mass of lid

If the position of the CG of the lid is not known, then a spring balance or similar can be used to measure the force required to hold the door open. If the force is measured at the upper mounting point U this force plus 10 – 15% safety factor is the F1 required. If the force is measured at any other point, use the perpendicular distance from the pivot point P to the attachment point of the spring balance as A and the spring balance reading as W in the formula.

DIAGRAM OF TYPICAL APPLICATION

(*Refer formula to calculate)

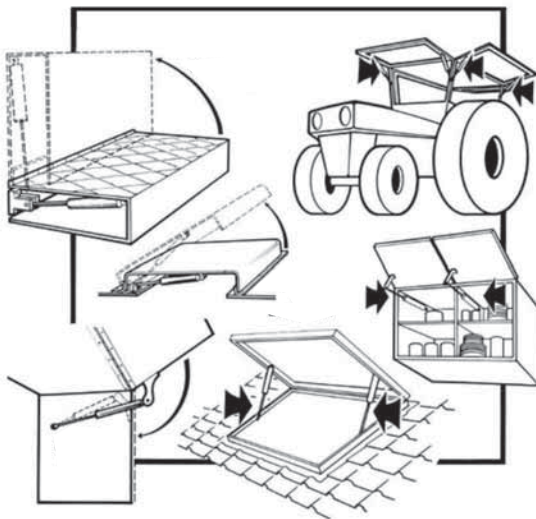

$$* F1 = \frac{W \times A}{B} + 10 \text{ to } 15\% \text{ safety factor}$$

NOTE:

By changing the Gaslift® axis U - L the lid can be made to open automatically once the catch is released, or stay closed so that no catch is required. The calculated force is only enough to balance the mass – add more to keep the flap firmly in place. Work to low side of the calculated pressure at first because additional gas can be added, but pressure cannot be reduced.

GASLIFT APPLICATION (A SELECTION OF EXAMPLES)

GASLIFTS

Custom Range

GAS FILLING MACHINE

Part #	Model	Derivative
144273	Gas Filling Machine	Gaslifts
144283	Hoses, Fittings & Trigger Valve	Gaslifts

S6-9-21.5346	22mm gas springs. 10mm rods, 19mm seals	Red seals

The Gabriel gas filling machine offers you the convenience of pressurizing the Gabriel industrial Gaslift to the application force required.

The gas filling machine may be purchased complete with regulators, hoses and fittings or these accessories may be bought separately.

TERMS & CONDITIONS

WARRANTY POLICY

WARRANTY ON GABRIEL SHOCK ABSORBERS

1. This warranty is expressed in lieu of All other warranties and representations express or implied.
2. Gabriel SA warrants that All products supplied to its customers comply with the relevant industry quality standards.
3. The Gabriel shock absorbers warranty is in accordance to the following schedule, subject to the specific restrictions and or warranty limitations which are detailed below.
 - 3.1 Gabriel® shock absorbers used on passenger cars and light commercial vehicles (up to 1 000 kg load capacity), are warranted for a period of 36 (thirty six) months from the date of purchase. This only applies in South Africa, Botswana, Namibia, Swaziland and Lesotho. Zimbabwe, Zambia, Malawi and Mozambique have a warranty as per 3.2 below on All vehicle types. All other countries terms and conditions are available on enquiry.
 - 3.2 Gabriel® shock absorbers used on All other types of vehicles are warranted for a period of 12 (twelve) months from date of sale to user, or 20 000 km, whichever occurs first.
 - 3.3 Gabriel® gas-springs (Gabriel Gaslift®), both industrial and automotive are warranted for a period of 12 (twelve) months from date of sale to user.
- 3.4 From time to time, Gabriel SA may run promotions or programs that strengthen the standard Gabriel Warranty Policy. In All circumstances, Gabriel SA will clearly state any changes to the Original Warranty in All of its communications. If a warranty is requested under the provisions of one of these programs or promotions, Gabriel SA will always ensure that it is processed in line with the specific terms and conditions stated.
4. The Gabriel SA warranty covers All manufacturing defects, but does not cover normal deterioration of product through normal use. Gabriel SA warrants that the products manufactured and or distributed shall be free from defects in material and workmanship.
5. Any product, in respect of which a manufacturing defect has been found, may be returned to Gabriel SA within its warranty period in order for it to be repaired or replaced or to have the purchase price of the product repaid, at Gabriel SA's discretion. The replacement unit will be similarly warranted but only for the balance of the duration of the original warranty.

CONSUMER PROTECTION ACT WARRANTIES

6. In terms of the Consumer Protection Act No. 68 of 2008 (CPA), in the event that a product supplied by Gabriel SA is unsuitable for its intended purpose, of poor quality, not in a good working order, defective, sub-standard or wears out before the reasonable service life of the product and the product is returned to Gabriel SA within six months after delivery of the product to the buyer, Gabriel SA will:
 - a) Repair the product;
 - b) Replace the product; or
 - c) Refund the price of the product.
7. In terms of the CPA, if Gabriel SA is directed to repair the product and within 3 months after that repair, that repair is ineffective or a further problem with the product is discovered, Gabriel SA will then replace the product or refund the price of the product.
8. Gabriel SA will have the right not to provide the remedies set out above to the extent that the CPA does not oblige Gabriel SA to do so in the circumstances of a particular case.

GENERAL CONDITIONS, RESTRICTIONS AND LIMITATIONS

9. The buyer of the product must make use of Gabriel SA's returns policy and claims procedure, available on the Gabriel website www.gabriel.co.za, or available directly from the company or any of its representatives. Except to the extent impermissible in terms of the CPA, no warranty claims will be approved by Gabriel SA unless these returns policy and claims procedures are followed.
10. Notwithstanding the returns policy but subject to the CPA, Gabriel SA reserves the right to at any stage reject the return of goods, should it feel that the goods have been abused or that the goods have deteriorated through excessive use within the warranty period. Gabriel SA shall then have the option to return the rejected goods to the buyer.
11. Gabriel SA shall not be liable for damages resulting from delays in shipment or inability to ship due to normal production and shipment delays or those resulting from acts of God, fires, floods, wars, sabotage, accidents, labour disputes or shortages, plant shutdown or equipment failure, voluntary or involuntary compliances with any law, order, rule or regulation of governmental agency or authority; or inability to obtain material (including power and fuel), equipment or transportation, or arising from any other contingency, circumstances or event beyond the control of Gabriel SA.
12. All Gabriel products are fit for purpose for which they have been supplied. In the case of products listed in this catalogue, products should only be used on the vehicles described and under operating conditions appropriate to these vehicles. The warranty does not extend to vehicles with lowered or modified suspensions and only to goods where the user can prove that such goods became defective in normal and proper use.
13. Except to the extent permissible in terms of the CPA, Gabriel SA will not be liable for any loss of profit or any consequential loss or damage, from whatever cause arising, including loss of any labour or fitment costs.
14. The above warranty only applies within the warranty period and when proof of purchase can be verified. A copy of the customer's original purchase invoice is required for All warranty claims. The customer's details should be provided with the claim.
15. Under no circumstances will warranty claims be entertained if the piston rod of the faulty unit has sustained any damage that appears to have been inflicted by tools
16. The warranty will be void if bump rubbers are not used.

PROCESSING WARRANTIES

For your ease and convenience, Gabriel SA have created a single telephone number to register either a Warranty or an Extended Warranty.
This number is **0861 GABRIEL (0861 422 7435)**

REGISTERING A NORMAL GABRIEL WARRANTY

- 1) To assist in the quick processing of claims through the Warranty Call Centre, it is important to have the following information with you prior to making the call:
 - a. The vehicle make, model and year that the part was fitted to.
 - b. The claimed product part number
 - c. The claimed manufacturing date code (required unless the product is still fitted)
 - d. The original invoice with date of issue and invoice number
 - e. The type of fault or customer complaint (this relates to the documented fault codes presented in the catalogue)
 - f. The motorist's name and phone number (optional)
 - g. The extended warranty registration number (if applicable)
- 2) Call 0861 GABRIEL (0861 422 7435) and request to log a standard Warranty Claim
- 3) A call centre agent will ask you the questions stated in No.1 above and should the answers fall in line with our warranty policy, a preauthorisation claim number will be issued (RMA Number). It is this number that is to be recorded along with your own request for credit documentation (RFC) back to your product supplier. We advise that this RMA number is physically written on the product with either a Black or White paint pen prior to returning the product back.
- 4) Should an RMA not be issued, the reason will be explained to you by the call center agent.
- 5) Gabriel SA can allow you the option to submit your requests for credit with your supplier, however you must first confirm with your supplier that they are happy to receive a claimed product without an RMA number. Further there are no guarantees that the claim will be honoured, as this is based on an inspection required by a Gabriel Representative who may reject the claim.
- 6) In line with its Warranty Policy, Gabriel honours All of its product from any store that a warranty is claimed from, irrespective of where the customer initially purchased the product from. If you are not the original seller, it is still your responsibility to validate if a customer has a valid claim and to process the claim in line with this procedure. We so advise that you make a copy of the claimed invoice for your records.
- 7) For further enquiries, please feel free to contact our offices or your Gabriel Representative.
- 8) See below for warranty fault codes required for your registration.

GABRIEL WARRANTY FAULT CODES

NO	NAME	DESCRIPTION
0	No fault found	There is nothing functionally wrong With the shocks
1	Fluid leak (Bottom)	Oil leak through bottom mounting/weld (Very rare)
2	Fluid leak (Top)	Oil leak through top seal
3	Mounting Bracket, Spring Seat or Rod broken	Visual inspection to see if one of the three is broken
4	Mounting rubber/sleeve failure	Worn out rubbers or rubber mountings that have moved out of the mounting
5	Loose dust cover/cap	Only applies to metal dust covers that rattle if weld has broken
6	No resistance	The rod will move up & down With no resistance
7	Low resistance/Soft (Check whether gas or non-gas)	It will take a little effort to compress
8	Seized/binding	Shaft will not move at all - in or out
9	Knocking Noise (Lag Effect)	Can only be checked off the vehicle. Takes experience to pick this up.
10	High resistance	Will take a lot of effort to move but could be in spec
11	Gas loss	Rod will not extend on its own
12	Squeaking noise	Dry squeaking sound coming from the shock
13	Grunting noise	More or less same as squeak but deeper
14	Safety critical fault	Anything broken on a strut or spring seat unit only
15	Failed By A Tester	Shocks have been failed by some type of suspension/shock testing equipment
